

Captor Therapeutics Ltd. is looking for a candidate to hold the position of:

Senior Scientist: *In vitro* Pharmacology

Ref. no: 2018.05.0010

location: Wrocław

Your main role will be establishing and optimization of the assays for probing small molecule drug candidates in pathological cell lines, as well as training and mentoring junior team members.

Requirements

- MSc in Biological Sciences or related disciplines and minimum of 4 years of experience in academia or industry, or PhD in Biological Sciences or related discipline and 1 year of experience
- Experience in low-to-high throughput assay development and execution
- Hands-on troubleshooting
- Analytical and problem solving skills
- Experience with MS Office suite

Key responsibilities

- Implementation of various *in vitro* cellular assays
- Execution of low-to-high throughput compound and/or biologics screens to support drug discovery campaigns
- Standardization, preparation and maintenance of pathological cell lines for drug discovery programs
- Development of low-to-high throughput cellular assays for internal drug discovery programs
- Development and execution of experimental strategies for the identification of biomarkers, modes of action of therapeutics
- Properly documenting and reporting the experimental findings and providing scientific contribution to research projects/programs in multiple disease areas
- Working closely with other team members

We offer

- Full-time employment in a quickly growing biotechnological enterprise
- Opportunities for a constant professional development
- Internal and external trainings, conferences, workshops
- Competitive salary
- Friendly work environment in a small team
- Medical care
- Financial support for a life insurance

Candidates are asked to submit their applications (CV and a motivation letter **in English** using this [link](#). We retain the right to contact only selected candidates.

Please attach this clause to both your CV and motivation letter:
